### **Work Performed Without Permits**

In order to avoid the opening of walls on projects completed without permits and therefore without the required inspections, we will accept a **signed** and **sealed** report from a New Jersey State Electrical Contractor for electrical work performed and a **signed** and **sealed** report from a New Jersey State licensed Plumbing Contractor for plumbing work performed without a permit.

This report must be done on the Electrical or Plumbing Contractor's letterhead and describe his/her repairs or corrections if any. For electrical work all accessible boxes must be checked including all receptacles, lights, switches, junction boxes and connections in the panel. This report, along with the required permit forms and folder, must be reviewed by the Building Department office prior to the first request for inspection.

If you have any questions regarding this required report, please contact the Building Department at the number above.
